

Greetings From the Board

Mr. Roy Schaufele - FCSI CCPR LEED Green Associate

Given all the recent world events it is that time of the year to truly appreciate and embrace all that we do have, family, friends, good health, good lifestyle and being involved in a growing viable technology. As the holidays have just passed, let us remember and revere our military personnel and all of those that, having made the ultimate sacrifice, are no longer here to share these Holidays with us...[read more](#)

Air Leakage Paths in a Typical Wood Framed Wall Assembly

(Mr. Laverne Dalgleish, ABAA)

The Air Barrier Association of America (ABAA) worked with Oak Ridge National Laboratories (ORNL) to conduct assembly testing on a wood framed wall to determine what part of a wall would leak the most. The testing was conducted at Tremco's facility in Cleveland Ohio, where they have a fully automated ASTM E2357 test apparatus...[read more](#)

Questions and Answers: Part 3: Installer Training

(Mrs. Katrina Zado)

1. What is the difference between training and certification?

Training and certification are closely tied together, but mean different things. Training is mandatory for all individuals who need to become certified installers. That is the first step. Also individuals...[read more](#)
